

DYNAMIC LIGHT BOX

Introduction

The dynamic light box is composed of light source and controller, which forms the animation effect in combination with the advertising fabric, and can realize the changeable creative advertising according to the designed animation, attracting people's eyes.

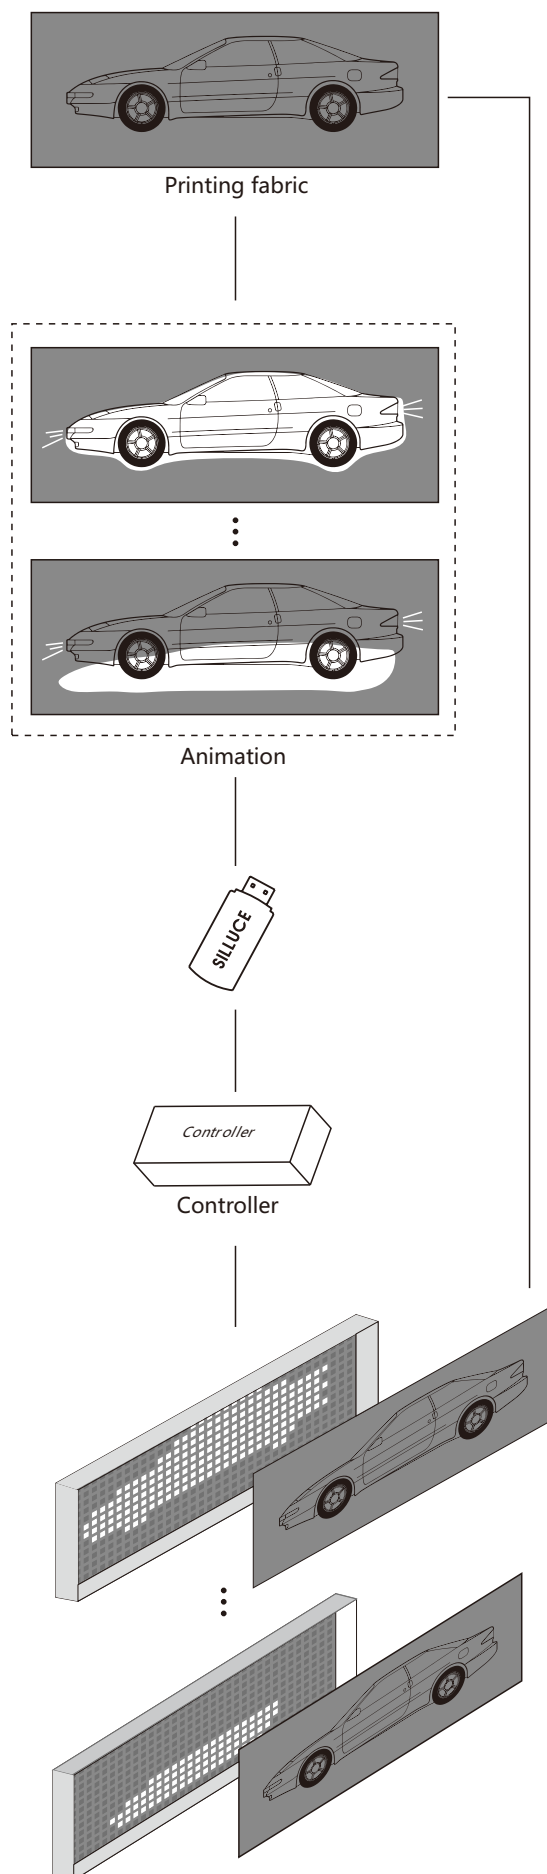

We use static picture effects to achieve dynamic through animation to make the picture full of vitality.

HD canvas print combined with animated video for perfect display.

Rich and varied animations will maximize the effects of stronger advertisements and brands, and can make people impressed.

The picture and the animation are changed together, and the light source can be reused, which greatly saves costs.

The operation is simple, and the effect can be changed according to the customer's preference.

Suitable for SCAN mode
